MINALOX
LIGHTING

MINALOX ART FRAMING PROJECTOR

Light the painting.
Not the wall.

INSPIRATION & APPLICATION

THE ART OF LIGHT

Art deserves more than illumination.
It deserves attention.

The right light reveals details, enhances atmosphere and allows each artwork to become the natural focal point of a space.

Light shaped around the artwork. Less distraction beyond it.

BEYOND CONVENTIONAL SPOTLIGHTING

A spotlight draws a circle. Art is rarely round.

A conventional beam often reaches beyond the artwork. Optical framing shapes the illuminated area to correspond more closely to the work, for a cleaner composition with less unwanted light on the wall.

CIRCULAR BEAM

FRAMED LIGHT

- Adjustable illuminated area
- Adjustable optical shutters
- Precise positioning
- Aligned with the artwork
- Less unwanted spill
- Optical focus adjustment

SHAPE THE LIGHT

Light shaped to fit the artwork.

SEE PRECISION IN MOTION

Watch the light take shape.

Discover how adjustable optical shutters shape light around the artwork.

THE GALLERY EXPERIENCE

When the light is right, everything else disappears.

VISUALISATION

DESIGNED FOR DIFFERENT SPACES

From one treasured painting to a whole collection.

Private residences	One work, lit with intent.
Galleries	Each work framed as exhibitions change.
Museums	A calm visual hierarchy across a room.
Hospitality	Lobbies, lounges and suites with a curated focus.
Art collections	Paintings, photographs, selected objects.
Architecture	Light as part of the composition.

MINALOX 24 V DUALWHITE

One light, from candle-warm to neutral white.

Choose the colour of light for the work, the room and the moment: warm for intimacy, neutral for clarity. The right setting is chosen per project, not by rule.

1800 K	2700 K	3500 K	4500 K
Candle-warm, intimate	Warm, inviting	Balanced, calm	Neutral, precise

COLOUR SCALE IS AN APPROXIMATION

24 V DC	1800–4500 K	CRI > 90	5 years
DUALWHITE	COLOUR TEMPERATURE	COLOUR RENDERING	WARRANTY

MOUNTING

Made to belong to the architecture.
